

Scrutineering Guidance 2020

Now the guidance for MSA officials which I have to follow has been brought out I think there is just a couple of things we need to add from my perspective.

1. Due to limited space and requirement for strict social distancing a smaller than normal selection of vehicles will be taken for eligibility examination and fuel testing.
2. All drivers must remain in or directly adjacent to their vehicle ie no congregating by the fence or with other drivers
3. No team members will be permitted in park ferme except for a single team member who will be called in should fuel sampling be required. That team member will not be permitted access unless they are wearing the minimum level of PPE, gloves and face mask.
4. Technical officials may request you to carry out certain actions within the park ferme area. Strict social distancing will be required. You may also use your single nominated team member to achieve this.

The technical officials may wish to visually inspect or measure an item, please respect social distancing while this is being done.
5. Paper tyre nomination forms will not be used this year due to contact restrictions. All tyre nominations for this year are to be completed online via the website. The Tyre Declaration form is within the Competitors section. This must be achieved by 09.00 prior to official qualifying.

I am sure there may be more guideline we may consider including as we progress, as this is still uncharted territory.

Thanks Ian.
